

OUR STRENGTHS

- Preventative Maintenance
- Corrective Maintenance
- System Installations
- Emergency Repairs
- Start Up & Commissioning
- On-Site Project Management
- Chemical Inventory Management
- Site Coordination
- General Contracting
- Operator Rotations
- Operator Training / Supervision
- Refurbishment Programs
- Plant Audits / System Surveys
- Controller Maintenance & Repair
- Sensor Maintenance
- Pump/ Accessory Repairs
- Piping Installation
- Equipment Pool Management
- Remote Monitoring Programs

SPECIALIZED SERVICES

- Softener Services
- Media Change Over
- RO Membrane Cleaning
- RO Membrane Replacement
- Cooling Tower Cleaning
- Sludge Removal
- Sample Collection
- Water Testing
- Passivation Service
- Web Based Monitoring
- Equipment Rentals
- Trial Staffing
- Controls Integration
- Heat Tracing & Insulation

Specialized Services

- Cooling Tower Cleaning
- Sludge Removal
- RO Services
- Heat Tracing & Insulation
- Tank Cleaning
- Piping Runs
- Equipment Refurbishment
- Trial Staffing
- Sample Collections
- Full Plant Equipment Audits
- Equipment Pool Management
- Outfall Monitoring

Many aspects of a water treatment operation can have a major impact on the overall performance of a water treatment program. EQS has developed a series of special services to address issues we have seen become problematic for the water treatment operator.

Our Specialized Service Resource Team is mobilized to provide rapid response to requirements outside the typical preventative and contract maintenance duties we perform routinely.

Examples of these types of services include cooling tower cleaning, sludge removal and a host of pre-treatment services such as RO membrane cleaning, replacement and media change overs.

We can install piping runs and routinely heat trace and insulate critical areas.

The EQS team expertise and manpower gives operators the ability to add staff for temporary projects or trials. We provide trained personnel to assist with sample collections, water testing and trial implementation tasks.

Our refurbishment programs can return unused or failed equipment into viable operating condition at a fraction of the cost of replacement equipment.

The Asset Management Program allows our customers to reclaim their equipment assets that are no longer in use or are in storage. We perform a detailed audit and place a value on the equipment. We will collect, refurbish, and warehouse the equipment until it's needed, eliminating the need to purchase new assets.
