

PULSAFEEDER®

Pulsafeeder's Corporation Stop Nozzle Assemblies are supplied in sizes .75in. and 1.0in., and are available in both NPT (male) and AWWA (male) pipe connection.

Reduced Lead Compliant Corporation Stops adhere to the Reduction of Lead in Drinking Water Act used in contact with potable water.

Corporation Stops provide two distinct advantages over a simple tap connection into large main pipes:

1. The nozzle may be extended for injection near the center of a large main for more effective chemical dispersion.
2. The nozzle assembly may be withdrawn and the corporation stop closed without interrupting the use of the main.

Operating Benefits

- Available in NPT and AWWA pipe connections.
- Injection near the center of a large main for more effective chemical dispersion.
- Withdraw the nozzle assembly and close the corporation stop without interrupting the use of the main.
