EquipSolutions®

EZPANEL

Standard Cooling Tower Panels

The new EZPanel offering by EquipSolutions includes three pre-engineered standard configurations for cooling tower control applications: Basic, Pro, and Premium. These scalable designs are tailored to meet the full spectrum of cooling tower needs from simple, essential monitoring to advanced, fully connected water treatment programs. Our EZPanels will come with industry leading components that you can rely on and trust to ensure your chemistry program's efficacy.

All panels are built with industry-trusted components, pre-programmed for plug-and-play startup, and thoroughly tested at our Roselle, IL facility. With no engineering costs and lead times under two weeks, EquipSolutions makes cooling tower control simple, fast, and reliable.

We will be utilizing Walchem Intuition-6 and Intuition-9 controllers. These industrial-grade water treatment controllers are known for their flexibility, reliability, and advanced control capabilities. The Intuition-6 supports up to 4 sensor inputs and 6 relay outputs, while the Intuition-9 accommodates up to 24 sensor inputs and 12 relay outputs, with additional I/O expansion available. Both models feature a full-color touchscreen interface, remote access via Ethernet or WiFi, and integrated datalogging with onboard graphing tools to support efficient monitoring and diagnostics.

GET A RAPID QUOTE

To get a quotation for the system right for your application, scan the QR Code, work through the configuration details you need, and you'll receive a formalized quote and a representative drawing of the system. If you prefer to talk through the application, give us a call and ask

EZPANEL MODELS

Our cooling tower panels are available in three levels: Basic, Pro, and Premium. The Basic model offers a compact, cost-effective solution for standard monitoring. The Pro adds advanced sensors, remote access via cellular modem, and a user-friendly coupon rack. The Premium includes everything needed to monitor and control complex chemistry programs.

BASIC EZPanel

The basic design includes:

- Walchem I6 Controller
- pH Sensor
- ORP Sensor
- Conductivity Sensor
- Basket Strainer
- Flow Switch
- Dimensions: 23” W x 28” H

PRO EZPanel

The pro design includes:

- Walchem I6 Controller
- pH, ORP, Conductivity Sensor
- Basket Strainer, Flow Switch
- PTSA Sensor & Power Pack
- Two Station Coupon Rack
- EquipConnect 2.0 Cell Modem
- Rotameter
- Gate Valve
- Dimensions: 38” W x 38” H

PREMIUM EZPanel

The premium design includes:

- Walchem I9 Controller
- pH, ORP, Conductivity Sensor
- Basket Strainer, Flow Switch
- PTSA Sensor & Power Pack
- Spare Sensor Tee
- Two Station Coupon Rack
- Two Corrosion Sensors
- EquipConnect 2.0 Cell Modem
- Rotameter, Gate Valve
- Dimensions: 38” W x 38” H
